## COSMOS-standard Approved Products at Chemlink Specialities

The COSMOS-standard is an internationally recognised certification for organic and natural cosmetics, developed to safeguard the welfare of the environment and of people.

It sets out innovative, challenging and progressive criteria for organic and natural cosmetics to ensure that:

- Cosmetic companies who use natural resources responsibly, source organic ingredients, respect biodiversity, and have clean manufacturing and packaging processes are recognised for their efforts
- Consumers have the clarity they need to make responsible purchasing decisions and help drive further sustainable development
- Green chemistry itself continues to grow and develop across the cosmetics industry

It applies to all aspects of the sourcing, manufacture, marketing and control of cosmetic products, and is on track to be the most widely used organic and natural cosmetics certification in the world.

Chemlink Specialities have long championed natural, responsibly-sourced ingredients, and we are proud to offer a broad range of COSMOS approved ingredients in our product portfolio. Together, we can create cosmetics that are good for the consumer and good for the environment.
